

INFORMATION SECURITY POLICY

Supply Chain Wizard Management, in all of its company operations that are carried out in the light of its vision to be one of the best and innovative companies among the engineering and construction companies serving worldwide, and in line with its mission to design, build and deliver safe, high-quality and cost-effective construction projects, has made a commitment to ensure the security of the information of Supply Chain Wizard and its stakeholders, to protect information assets, to meet information security requirements and expectations within the scope of applicable requirements and international standards, to improve information security performance by systematically managing risks, to ensure infrastructure and operational security, and to assure that all employees will operate within the framework of the company information security policies and procedures.

The information security policy developed for this purpose will provide the following primary requirements:

1. Context of the Organization

- Evaluate interested parties and external issues
- Determine internal and external issues
- Ensure compliance with legal and regulatory requirements and contractual obligations

2. Leadership & Management

- Define information security objectives
- Establish the information security organization
- Support continual improvement in information security
- Provide protection of corporate knowledge

3. Planning

- Plan how to achieve information security objectives
- Evaluate the effectiveness and risks of activities
- Manage and take precautions to primary risks

4. Support

- Allocate the necessary resources for the establishment, implementation and continuous improvement of the information security management system
- Raise the awareness of Supply Chain Wizard employees and stakeholders' responsibility of ISMS
- Promote trainings for the development of competencies that may affect the information security performance
- Provide management of documents and records containing corporate information

5. Operation

- Ensure that the processes are performed as planned
- Review the risks and controls as a result of the planned changes
- Protect the information assets in both electronic and physical environments

6. Assessment & Improvement

- Monitor and measure the performance, adequacy, conformity and efficiency of ISMS
- Monitor, report and evaluate information security event
- Perform regular audits
- Build an ISMS structure which will not allow the recurrence of non-conformities
- Perform the monitoring, measuring, evaluation and reviewing activities
